

Equipment and Resources Policy

This policy has been written for Braunston Preschool CIO to ensure that all resources and equipment used are kept to a high standard of repair. This will ensure the safety and enjoyment of the children whilst at the setting. It is the responsibility of the staff to check and maintain resources and equipment throughout the day.

At Braunston Preschool CIO we understand the importance of having a wide variety of resources and equipment for the children to use. All equipment will meet the children's individual needs and promote diversity, understanding and development. Children will be able to access all resources and equipment throughout the day ensuring that they are engaged in their play.
